Objective

Applying for the Role as a Software Engineer

Education

Highlands High School
Sacramento, California
Chaffey Community College
Rancho Cucamonga, California
Full Stack Web Application
Southern Methodist University
Dallas, Texas

Experience

08/2018-Present
Software Engineer I • IT Department
• Wellington Insurance Company/Truist Insurance

Trained in IBM Rpgle and SQL DB2. Responsible for maintaining and creating new programs that fit the need of the company. Also trained in SQL queries as well as IBM queries to generate reports for analyzing data.

Key Skills

IBM AS/400 Trained
SQL Trained
Debug/Analyzing
Crown Equipment Certified

Communication

I started my work career doing a lot of warehouse work. I then was giving a chance to be in a classroom setting where I was able to learn RPG and some SQL. Going from zero knowledge to now be able to analyze, debug, create and maintain programs. I have recently began a full stack web developer boot camp, where I am learning front end tools as well as back end tools to be able to develop a web application from both the front end and back end.

Leadership

At Wellington Insurance Company. I am a leader in the Printing Operations and in charge or instructing team members in the company printing process.
